

EUROPE

ITALY

The Italian Association of Interventional Radiographers (AITRI) is a professional scientific association, legally founded by a valued group of Italian radiographers in 1999. It represents the radiographers in the fields of interventional, medical imaging and cardiovascular radiography.

The aims of AITRI is the development of interventional radiographers through conferences, courses and meetings and to engage in mutual research through other countries, data exchanges and student exchanges.

Also the promotion of common guidelines and increasing of the skills of all the professionals involved in the specific areas of radiology, angiography and cardiology are our purposes.

AITRI is self-governed, independent of governments, political parties and economic pressure groups.

AITRI has been a full member of EFRS since 2012.

Diego Catania

Above: Dr Diego Catania at the ISRRT Council meeting in Helsinki.

Group picture top right:

Third person from left is Dr Diego Catania, President and Founder of AITRI, Italian Association of Interventional Radiographers (Milano, IT), the seventh person is Dr Rossella Trenti, Board member and Head of the Education program of AITRI (Bologna, IT), and the person far right is Dr Louise Rainford, Head Diagnostic Imaging University of Dublin (IR), together with the students of the English Course for Radiographers promoted by AITRI and delivered by the European Academy of English for Health Professionals (www.eaehp.org) in partnership with the UCD (University College of Dublin).

- 22 chapters, each one a stand-alone lecture with soundtrack and printable text
- Over 1800 high quality annotated radiographs and illustrations
- Index and dictionary included for use as an atlas.
- Developed by **Dr. Ian Cowan MB.ChB. FRANZCR Radiologist New Zealand** for radiographers in remote locations

Cost 25 pounds plus shipping

Obtainable from Head Office of ISRRT

For more information email isrrt.yule@btinternet.com

My goal is that this resource will give you a strong base of understanding about some fundamental principles of X-ray interpretation, and knowledge about some of the abnormalities that x-rays can show to the trained eye

*Dr. Ian Cowan MB.ChB. FRANZCR
Radiologist New Zealand*

Radiographer Quotes from feedback following Uganda workshop on Image Interpretation.

All the information on the CD was superb and to me it acted as a reference source for those who do not have other reference books on imaging

Guided me in clinical discussion with General Practitioner for patient better outcomes with good diagnosis and decision making on case management.

A comprehensive atlas of Xray image interpretation.

It will be very useful since it gives the radiographer confidence in providing a documentary opinion on their product.
